Title Index

Advances in the Measurement of Ambient Carbon Fibers, 31
Aerosol Capture in Granular Beds in the Sedimentation and Diffusion Dominated Regimes, 195
Aerosol Deposition in the Human Lung at Variable Tidal Volumes: Calculation of Fractional Deposition, 215
Aerosol Particle Formation from Ozone-Terminal Olefin Reactions, 167
Aerosol Science and Technology in Service to Society, 351
Air Flows induced by Sparse Clouds of Droplets, 187

Bipolar Steady State Charge Fraction of Ultrafine Aerosols, 25

Closed Form Equations for the Evaporation Rate and Droplet Size of Knudsen Droplets, 177
Coagulation Rate of Polydisperse Particles, 327
Computer Program and Algorithm Review: MAEROS, 117
Condensation Feedback Mechanism for Oscillatory Nucleation and Growth, A, 367
Condensational Growth of Ultrafine Aerosol Particles in a New Particle Size Magnifier, 353

Dynamics and Measurement of Smokes III, 397
Dynamics and Measurement of Smokes IV, 405
Dynamics of Fibrous-Type Particles: Brownian Coagulation and the Charge Effect, 9

Effect of Coal Type and Residence Time on the Submicron Aerosol Distribution from Pulverized Coal Combustion, 77
Effect of Particle Precharging on the Performance of a Fabric Filter Collecting Lead Smelter Dust, The, 381
Evaluation of Metal Oxide Whiskers Grown on Screens for Use as Aerosol Filtration Media, 411

Flat Flame Ultrafine Aerosol Generator, 17

Growth and Deposition of Saline Droplets Covered with a Monolayer of Surfactant, 155

Homogeneous Condensation of Argon: An Experimental Study Using the Nozzle Flow of a Cryogenic Ludwieg Tube, 71

Intrinsic Calibration of the Pollak Counter–A Revision, 125

Large Particle Size Distribution in Five U.S. Cities and the Effect on a New Ambient Particulate Matter Standard (PM_{10}), 467
Letter to the Editor: On "Inversion" of Aerosol Size Distribution Data, 345
Lidar and Balloon-Borne Cascade Impactor Measurements of Aerosols: A Case Study, 259
Light Scattering by Nonspherical Particles: A Laboratory Study, 39
Log-Normally Preserving Size Distribution for Brownian Coagulation in the Free-Molecule Regime, 53

Measurement of Aerosol Concentration as a Function of Size and Charge, 293
Measurements of Kelvin-Equivalent Size Distributions of Well-Defined Aerosols with Particle Diameters above 13 nm, 107
Measurements of Radon and Radon Daughter Aerosols in Socorro, New Mexico, 277
Multiple Electromagnetic Scattering from a Cluster of Spheres. I. Theory, 227
Multiple Electromagnetic Scattering from a Cluster of Spheres. II. Symmetrization, 237

Nucleation and Growth of Aerosol from a Continuously Reinforced Vapor, 135

On Ostwald Ripening, 283

Particle Deposition by Diffusion and Interception from Boundary Layer Flows, 3
Particle Deposition in Replicate Casts of the Human Upper Tracheobronchial Tree Under Constant and Cyclic Inspiratory Flow. I. Experimental, 245
Particle Deposition in Replicate Casts of the Human Upper Tracheobronchial Tree Under Constant and Cyclic Inspiratory Flow. II. Empirical Model, 253

© 1984 Elsevier Science Publishing Co., Inc.

0278-6826/84/$3.00

A Perturbation Model for the Computation of Collection Efficiency for Axially Symmetric Collectors, 317

Reducing Blowoff in Cascade Impactor Measurements, 431

Sample Extraction Diluter for Ultrafine Aerosol Sampling, A, 441
Single-Breath Deposition of Jet-Nebulized Saline Aerosol, 97

Technical Note: Estimation of the Heterogeneous Lifetime of Gaseous Species in the Presence of Aerosol Surface, 103
Theoretical Response Characteristics of the Coherent Optical Particle Spectrometer, 305
Total Deposition of Ultrafine Hydrophobic and Hygroscopic Aerosols in the Human Respiratory System, 453

Venturi Scrubber Optimization Revisited, 63

Water Solubility of Cloud-Active Aerosols, 335
Kenneth T. Whitby, 121
